Subject: Devil's Swamp Lake Site Weekly Update - Week 2/4/13

Mr. Cañellas:

Please find summarized below a description of activities on the Devil's Swamp Lake Site for the week of 2/4/13.

- On February 5, 2013, Clean Harbors and CRA set and baited approximately 12 crawfish traps in the northern portion of Devil's Swamp Lake and the North-Central Devil's Swamp areas. The traps were pulled and checked for crawfish on February 8, 2013 and no crawfish were collected.
- The Mississippi River water elevation is currently approximately 28 feet at the Baton Rouge gauge. The current 28-day forecast shows a minor rise to approximately 30 feet at the Baton Rouge gauge by February 17, 2013 before beginning a steady fall around February 19, 2013. The Mississippi River water elevation and temperature will continue to be monitored to evaluate conditions for

9634396

crawfish sample collection. Clean Harbors and CRA will also continue to periodically set sample traps to check the availability of crawfish.

Should you have any questions or need additional information, please do not hesitate to contact me. Thanks.

John C. Arbuthnot, P.E.
